API Documentation

Comprehensive RESTful APIs for authentication, user management, community features, ATS scanning, admin controls, and notifications in the Elevora AI platform.

Available Endpoints

API	Method	Endpoint	Description
User Signup	POST	`/api/v1/auth/signup`	Register a new user with role-based access.
User Login	POST	`/api/v1/auth/login`	Authenticate user and return JWT token.
User Streak	GET	`/api/v1/user/streak`	Get user's current streak information.
Latest News	GET	`/api/v1/latest-news`	Fetch latest tech news updates.
Submit Feedback	POST	`/api/v1/feedback`	Submit user feedback to the platform.
ATS Resume Scan	POST	`/api/v1/ats/scan`	Analyze resume for ATS compatibility and keywords.

API	Method	Endpoint	Description
Admin Courses	GET/POST	/api/v1/admin/courses	Manage courses (GET list, POST create).
Notifications	GET	/api/v1/notifications	Get user notifications.

Examples & Responses

User Signup

Register a new user with role-based access.

Example Request

```
fetch("/api/v1/auth/signup", {
  method: "POST",
  headers: { "Content-Type": "application/json" },
  body: JSON.stringify({
    name: "John Doe",
    email: "john@example.com",
    password: "securepass",
    role: "user"
  })
})
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
{
  "success": true,
  "message": "User registered successfully",
  "data": {
    "id": "64f1a2b3c4d5e6f7g8h9i0j1",
    "name": "John Doe",
    "email": "john@example.com",
    "role": "user"
  },
  "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9..."
}
```

User Login

Authenticate user and return JWT token.

Example Request

```
fetch("/api/v1/auth/login", {
  method: "POST",
  headers: { "Content-Type": "application/json" },
  body: JSON.stringify({
    email: "john@example.com",
    password: "securepass"
  })
})
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
{
  "success": true,
  "message": "Login successful",
  "data": {
    "id": "64f1a2b3c4d5e6f7g8h9i0j1",
    "name": "John Doe",
    "email": "john@example.com",
    "role": "user"
  },
  "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9..."
}
```

User Streak

Get user's current streak information.

Example Request

```
fetch("/api/v1/user/streak", {
  headers: { Authorization: "Bearer <token>" }
})
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
{
  "success": true,
  "data": {
```

```
    "currentStreak": 7,
    "longestStreak": 14,
    "streakStartDate": "2025-09-10"
  }
}
```

Latest News

Fetch latest tech news updates.

Example Request

```
fetch("/api/v1/latest-news")
  .then(res => res.json())
  .then(data => console.log(data));
```

Example Response

```
[
  {
    "id": 1,
    "title": "Latest AI Breakthroughs",
    "description": "Summary of recent news...",
    "url": "https://news.example.com/article1",
    "date": "2025-09-17"
  }
]
```

Submit Feedback

Submit user feedback to the platform.

Example Request

```
fetch("/api/v1/feedback", {
  method: "POST",
  headers: { "Content-Type": "application/json" },
  body: JSON.stringify({
    rating: 5,
    comment: "Great platform!"
  })
})
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
{
  "success": true,
  "message": "Feedback submitted successfully"
}
```

ATS Resume Scan

Analyze resume for ATS compatibility and keywords.

Example Request

```
fetch("/api/v1/ats/scan", {
  method: "POST",
  headers: { "Content-Type": "application/json" },
  body: JSON.stringify({
    resumeText: "John Doe... Full resume content",
    jobDescription: "Required skills: React, Node.js..."
  })
})
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
{
  "success": true,
  "data": {
    "matchPercentage": 85,
    "keywords": ["React", "Node.js", "MongoDB"],
    "suggestions": ["Add more quantifiable achievements"]
  }
}
```

Admin Courses

Manage courses (GET list, POST create).

Example Request

```
// GET all courses
fetch("/api/v1/admin/courses", {
  headers: { Authorization: "Bearer <admin-token>" }
})
```

```
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
[
  {
    "id": "course1",
    "title": "DSA Fundamentals",
    "description": "Learn Data Structures and Algorithms",
    "topics": ["Arrays", "Linked Lists"]
  }
]
```

Notifications

Get user notifications.

Example Request

```
fetch("/api/v1/notifications", {
  headers: { Authorization: "Bearer <token>" }
})
.then(res => res.json())
.then(data => console.log(data));
```

Example Response

```
[
  {
    "id": 1,
    "title": "New Assignment Available",
    "message": "Complete DSA Quiz",
    "read": false,
    "date": "2025-09-17"
  }
]
```

Error Codes

Common Errors

Code	Description
400	Bad Request - Invalid input data or missing parameters
401	Unauthorized - Authentication required or invalid token
403	Forbidden - Insufficient permissions for the action
404	Not Found - Resource or endpoint not available
500	Internal Server Error - Unexpected server-side issue

All requests require proper authentication. Base URL: `/api/v1/auth/`
